PROJECTS

Blogs App — *React, Redux, Node, Express, MongoDB*

The user can add ,update or delete the blogs that he/she reads online and view other user's blogs too. I learned managing complex states and dynamic routing. This was done by writing well structured and modular code along with tests. I also learned about user administration and authentication.

Library App — *Express, MongoDB, Pug, Bootstrap*

The user can view, update, create and delete different entities involved in a library system. I learned server side rendering using Pug as a template engine. I also learned about the async library for parallel data fetching from the database.

ToDo App — *Vanilla JS, Webpack, SASS, localStorage*

The user can add or delete the upcoming tasks grouped under a single project. I learned about the importance of the module pattern in ES6. I also learned the working of the module bundler.

EXPERIENCE

Persistent Systems Ltd., Pune — *Software Engineer*

August 2021 - PRESENT

- I joined as a graduate trainee.
- I have been appreciated for willingness to learn during the training program.
- I scored more than 70% in all tests conducted in Phase 1.
- I am currently working on the project for Phase 2 evaluation.

Finlok, Pune — *Intern Product Engineer*

January 2020 - June 2020

- I worked on the prototype of the product.
- I implemented the Proof of Concepts for the android application.
- I also conducted user research with other team members.
- The team followed the agile development process which included daily standups.
- I learned and applied different concepts of UX in prototype development.
