PROJECTS

CSS Component library

Github link -

<https://github.com/foolhardy21/component-library-doc/tree/p2-menu-page>

Live link - <https://deploy-preview-8--zen-bartik-5ee75e.netlify.app/>

The following React web apps have:

1. Followed Git feature branch workflow with code reviews.
2. `useReducer` for state management, `useContext` for accessing state across components.
3. `async-await` for API calls, `error handling` for APIs.
4. React router `v6` for page routing, authentication for private routes.
5. Higher order components.
6. Component library mentioned above for UI.

E-commerce App
